DETAILED ACTION

Allowable Subject Matter

1. Claims 1-60 and 63-68 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach some of the limitations found in independent claims 1 and 47. With respect to independent claim 1, the prior art of record, Das et al '520, does not teach two elongated electrodes defining a discharge region and having a gas flow with a gradually increasing cross section downstream of the electrodes. Das also does not teach a pulse power system providing electrical pulses to the electrodes sufficient to produce laser output pulses at rates of up to and above 4,000 laser output pulses per second with precisely controlled pulse energies, as is recited in independent claims 1 and 47. Therefore, independent claims 1 and 47, as well as all dependent claims, are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
